About Me

I am a professional graphic designer with 3 years of experience and a web Developer with 7 years in relevant fields. I love to solve problems with my visual compositing skills. Hope we can collaborate together.

Education

2009 - 2013

Bachelor in Computer Science

Missouri State University - MO

Skills

Graphic Design

PHP

Web Development

WordPress

FrontEnd

HTML5

CSS3

JavaScript

Bootstrap

Experiences

2022 - Present

Full Stack Developer

Affinis | Farmingham, USA

Working as a Full Stack Developer, working on different PHP WordPress, custom, and MVC frameworks including Shopify. While on the front end, I have used React and Vue at the beginner level as JavaScript frameworks and CSS, CSS 3, SASS, and Bootstrap for styling. I use to work remotely for this company.

2020 - 2022

WordPress Developer

Encoder Squad | USA

- Worked in Strong Design and Front-end with Photoshop, AI, In-design, Figma, HTML 5, CSS 3, JavaScript, and jQuery.
- Developed, deployed, and uploaded content using WordPress.
- Worked expertly on developing WordPress websites with great eye-catching designs.
- In that company, I have prior experience in page builders like Elementor, Visual Composer, etc.
- In that company, I got knowledge about how to use different Plugins.
- I Analyse business requirements and advise on the best way to implement them in WordPress.
- Handling website security and backups for WordPress sites.
- Woo Commerce integration and customization.
- Work independently without direct supervision and be a team player at the same time.

Skills

jQuery

MySQL

Mongo DB

React

Experiences

2017 - 2020

Senior Front End Developer

PX Media INC | Nevada, USA

Front-end development using the latest HTML5 and CSS3 techniques and bootstrap backed by javascript and jquery to enable optimum user experience throughout the site.

- I worked in Agile methodology.
- Participated in projects in all stages of the product life cycle.
- Executed and contributed to Full-Stack Web development projects, with an emphasis on front-end features, browser manipulation, and cross-browser compatibility.
- Setting up robust back-end functionality using technologies like PHP, Cake PHP, and WordPress.
- Worked on HTML into WordPress templates.
- Made WordPress custom themes.
- Working on the functionality of an assortment of widgets, modules, plugins, and API.
- Setting up databases to work in compliance with the back-end using MySQL and Mongo DB.
- Equipping myself with the knowledge of best practices and programming paradigms.

2014 - 2017

UI/UX Designer

Inspire Media Group | California, USA

In that company, I was hired as a graphic designer. My duties were to make new designs for clients and products. After 1 year of designing I have started working on the Front-end side in HTML, CSS, JavaScript, and JQuery. PSD into HTML, image into HTML. I made so many designs by myself and make HTML templates from scratch.
